Professional Profile

During my professional career in Digital Entertainment Design Engineering, I discovered my passion for programming, and since then, I have been preparing myself to participate in projects as a backend developer, especially those developed with PHP and Nodejs.

I have the ability to adapt to different projects, and I have no problem working alone or in a team. I love learning new things and have a good tolerance for frustration.

Work Experience

Upwork, Medellín - Frontend Developer
November 2023 - March 2024
- Design the images, structure, and aesthetics of the webpage for morenofoundation.org in order to give the foundation's page a new look.
- Develop the previously designed mockup in Wordpress.
- Migrate the domain from Google Domain to Wordpress in order to manage the entire page from Wordpress.
- Achievement: Successfully explained the migration steps to Wordpress to the client.
- Achievement: Changed the design and fixed details according to client feedback with the aim of making them as satisfied as possible with their website.

Cielum Health, Medellín - Web Designer
March 2022 - September 2022
- Create mockups for the company's product portfolio with the aim of having a website showcasing the services offered.
- Program the company's product portfolio using HTML, CSS, Vue.js, and Git.
- Create mockups for a medical website for personal use with the goal of migrating from ZohoOne to a custom solution.
- Create infographics on health topics for Helpharma to raise awareness among previously selected audiences.
- Edit videos for events, contests, and social media.
- Achievement: Leveraging my CSS knowledge, I improved the workflow by modifying the information exported from Illustrator for the subsequent development of web pages.
